TESTED AND PROVEN HOME SECURITY, AGAINST ALL THREATS

PANTHER PROTECT has been extensively lab tested and exceeded the Australian standard impact limit by over 20x for forced entry - certified by NATA. Locally, with SIRIM's standard security mesh test, it is the brand that can withstand the highest load at close to 1 tonne. Its massive strength comes from our patented proprietary SCREW-LESS mesh retention design, which uniformly distributes impact load onto the entire frame. Competitors' screwed mesh system fails much earlier as impact load is concentrated on screw points.

DESIGNED AND CONTINUOUSLY IMPROVED WITH SECURITY IN MIND

PANTHER PROTECT was designed from ground up to overcome common failures in common grilles and mild steel security doors in the market. Potential threats to our system are researched and improvements made available in the next product cycle. Additional security features such as anti lock snap cylinder, 3 types of functional multipoint lock, and key lockable multipoint bar present on PANTHER PROTECT PREMIUM Gen4 are direct results of such.

TIMELESS ELEGANCE AND IMPROVED VIEW

Unlike common grilles that rust and corrode over time, PANTHER PROTECT doors and windows always looks elegant over time. Made of weatherproof powder coated structural aluminum AL6063-T6 frame and SUS316/304 stainless steel mesh, our product comes with limited manufacturing warranty of up to 15 years for your peace of mind. Its modern and simplistic design easily conforms and accentuates the original design of your home while offering you excellent see through visibility of your surroundings' beautiful view.

PREVENTION OF INSECT TRANSMITTED DISEASE

Panther Protect mesh is made of high grade SUS316 / SUS304 stainless steel wire, interwoven into mesh form with gaps small enough to keep mosquitoes and flies out of your home - effectively keeping you and your loved ones safe from insect transmitted disease.
